PROFILE SUMMARY

Vocational High School student (SMK) majoring in Software Engineering with hands-on experience building full-stack web and mobile applications. Proficient in JavaScript, TypeScript, and PHP using Next.js, React, React Native, Laravel, and Express.js. Has independently designed and shipped two production-style systems featuring REST APIs, OTP/OAuth authentication, and relational databases. Fast learner with strong problem-solving skills, currently seeking an industrial internship (PKL) to apply technical skills in a real, professional engineering environment.

TECHNICAL SKILLS

Core Focus	Frontend Web · Backend Development · Mobile Development (Cross-Platform)
Languages	JavaScript, TypeScript, PHP
Frameworks	Next.js, React, React Native (Expo), Laravel, Express.js
Databases	MySQL, PostgreSQL, SQLite, Supabase
Tools & VCS	Git, GitHub, GitLab, Postman, Figma
Soft Skills	Problem-Solving · Fast Learner · Team Collaboration · Time Management

PROJECT EXPERIENCE

SIPMAS — *Sistem Informasi Pengaduan Masyarakat* — Full-Stack Web & Mobile 2026

- ▶ Built a multi-platform reporting ecosystem: a Next.js web portal for RT/RW administrators and an Expo React Native mobile app for residents.
- ▶ Engineered a secure Express.js + MySQL REST API with multi-step authentication (Email OTP & Google OAuth 2.0).
- ▶ Implemented real-time complaint tracking via WebSocket and immutable audit logs for administrative transparency.
- ▶ Added automated PDF report generation (PDFKit) for monthly community activity summaries.

GeniusLib — *School Library Management System* — Full-Stack Web & Mobile 2025

- ▶ Developed a hybrid library system: a Next.js/Tailwind CSS dashboard for librarians and a React Native app for students.
- ▶ Designed an Online Catalog (OPAC) with book reservation and QR-code-based digital membership cards.
- ▶ Optimized circulation database queries for real-time inventory and automated fine calculation logic.

EDUCATION

SMK Taruna Bhakti Depok — Software Engineering (Rekayasa Perangkat Lunak) Exp. Graduation 2027

CERTIFICATIONS

- ▶ Coding Camp 2026 — DBS Foundation Scholar, Full-Stack Web Development Track
- ▶ Belajar Dasar Pemrograman Web — Dicoding Indonesia (Verified)
- ▶ Belajar Membuat Front-End Web untuk Pemula — Dicoding Indonesia (Verified)
- ▶ Belajar Fundamental Back-End dengan JavaScript — Dicoding Indonesia (Verified)
- ▶ +8 additional verified certificates — full list available on Portfolio Website

PROJECT PORTFOLIO

Muhammad Ardiansyah — Selected Work

SIPMAS — Sistem Informasi Pengaduan Masyarakat 2026

Next.js Expo React Native Express.js MySQL Supabase WebSocket

A multi-platform digital ecosystem (Next.js web + Expo React Native mobile) built to streamline transparent community complaint reporting at the local RT/RW administrative level. Powered by an Express.js backend and MySQL/Supabase databases, with real-time tracking via WebSockets, immutable audit logs, and OTP/Google OAuth 2.0 authentication.

GeniusLib — School Library Management System 2025

Next.js Expo React Native Express.js MySQL Tailwind CSS QR Code

A hybrid library management system integrating a Next.js + Tailwind CSS web dashboard for librarians with a React Native mobile app for student access. Automates the entire physical book circulation workflow: online catalog (OPAC), QR-code digital membership cards, booking reservations, and automated fine calculations.
